Turn on/off Procedures

At the start of the day:

1. Turn on the two monitors in the back of the room and one of the monitors in the front of the room. The monitor on the tall grey cart is programmed to power on when you connect for an I-TV class.
2. Turn on the document camera.
3. The other electronics in the teaching podium should be left on. The equipment is often used for testing and other connections.

At the end of classes each day:

1. Turn off the four television monitors and the document camera.
2. Turn off any lights in the room.
3. Everything else in the teaching podium should be left on.
